

ACCESS CONTROL

Hosted IP Access Control Services

SaaS

Software-as-a-Service solution eliminates the need for dedicated servers and software. IT hassles and operating system obsolescence are no longer part of the equation with hosted access control.

SCALABLE

Unmatched scalability and versatility for 1 door or multiple door systems. Geographically dispersed systems easily managed as well.

SIMPLE TO USE

System management is accomplished by using any standard web browser. No software to install and remote system management is standard.

COST EFFECTIVE

Because hosted access control systems are easier to implement and manage, the total cost of ownership is much less than with traditional access control systems.

Web hosted access control solutions provide reliable, real-time access control of your facilities. Eliminate the need for dedicated servers, software installation, and other IT hassles commonly experienced with traditional access control systems.

Manage Multiple Sites

Secure Hosting Center

Standard Web Browsers

Managing a web-hosted access control system couldn't be easier. Using any standard web browser; simply login to the web portal from anywhere you have internet access and centrally manage one door or thousands around the globe without adding additional network infrastructure.

System Features

- Unlimited number of sites, doors, and users
- No software to install, no dedicated PC needed.
- No servers or IT support needed—backups, archives, and upgrades are handled by the data center.
- Receive instant notification of system events via email or text message.
- Software updates are automatic and at no extra cost
- Wireless control panel option provides cost effective option for remote gates.
- Integrated Photo-ID badge design and printing interface fully integrated into application.
- Lower total cost of ownership
- 128 bit encryption & SAS Audited

Optional wireless GSM controllers provide connectivity at remote gates or locations with no communications infrastructure.
