

High Definition Network Video Recorder

HIGH DEFINITION

Record video beyond the traditional analog recording capabilities. Capture what means the most to you in full high resolution detail, without pixilation and unusable images when you need them most. HD Recording up-to 8 Megapixels.

SIMPLE DESIGN

Powerful Software that is easy to use with a familiar graphical user interface.

COST EFFECTIVE

High Definition Video Surveillance Systems for everyone. Priced similarly to inferior analog video surveillance systems.

TOTALLY CONNECTED

Access your video from any Windows, Mac, or Linux client. Support for iPhone, iPad, or Droid mobile device for additional connectivity. The choice is yours.

- **Beyond High Definition Recording:** Capture images up to 8 Megapixels in size. Full frame rate video .
- **Open Architecture:** Compatible with most IP video surveillance cameras from the industry's leading manufacturers.
- **Simple intuitive interface:** Easy to use software without the need for extensive training.

High Definition Video Surveillance Systems have been limited to those with deep pockets, until now. Multiguard Corporation is pleased to provide our traditionally "High-End" solution to the price conscious small business.

Product Features

- Support for up to 64 cameras
