# INSPECTION ASSURED <sup>SM</sup>
## Authenticated Inspection Services

**Fire Alarms**  **Security Systems**  **Emergency Lighting**  **Exit Signs**

## VERIFIABLE RESULTS

All inspections are performed by scanning the inspected device's barcode. The moment the equipment is scanned the record is time/date stamped for accurate irrefutable record keeping.

## INTELLIGENT REPORTING

Our intelligent reporting system provides comprehensive data on every device inspected. Unique bar code registration, records the inspectors progress in real time and prevents the inspector from missing a device.

## WEB BASED

Access and review your inspection reports when it's convenient for you via our web portal or free iPhone App.

## VERSATILE

Inspection Assured <sup>SM</sup> is compatible with various types of systems Including: Fire Alarm Systems, Security Systems, Video Surveillance Systems, Access Control Systems, Exit Signs, and Emergency Lighting.

**Inspection Assured** <sup>SM</sup> is an Authenticated Inspection Service that utilizes a barcode based reporting system to ensure accurate inspections of Commercial Fire Alarm Systems, Security Systems, and Emergency Exit Signs and Lights. Reports are generated electronically and are accessed through our web portal or free iPhone App. Our inspection process ensures that no equipment is missed during an inspection and delivers consistent, legible and easy to understand reports.

### System & Service Features

- Barcode based inspections ensure accuracy
- Third party inspection verification
- Easy report retrieval through web portal or iPhone App.
- 5 year archive and retrieval of inspection reports
- Intuitive inspection reports that are easy to understand

- **Barcode Based Inspections:** All equipment and devices subject to inspection are provided with a unique barcode. This barcode is scanned during the inspection process and the devices condition is recorded.

*10256189*
